## **Solitary Self:**

**The Solitary Self** Mary Midgley, 2010 Argues that simple on sided accounts of human motives such as the selfish gene in neo Darwinian thought are always unrealistic and do not derive from Darwin s writings The Significance of Consciousness Charles Siewert, 1998-07-27 Charles Siewert presents a distinctive approach to consciousness that emphasizes our first person knowledge of experience and argues that we should grant consciousness understood in this way a central place in our conception of mind and intentionality Written in an engaging manner that makes its recently controversial topic accessible to the thoughtful general reader this book challenges theories that equate consciousness with a functional role or with the mere availability of sensory information to cognitive capacities Siewert argues that the notion of phenomenal consciousness slighted in some recent theories can be made evident by noting our reliance on first person knowledge and by considering from the subject s point of view the difference between having and lacking certain kinds of experience This contrast is clarified by careful attention to cases both actual and hypothetical indicated by research on brain damaged patients ability to discriminate visually without conscious visual experience what has become known as blindsight In addition Siewert convincingly defends such approaches against objections that they make an illegitimate appeal to introspection Experiences that are conscious in Siewert s sense differ from each other in ways that only what is conscious can in phenomenal character and having this character gives them intentionality In Siewert s view consciousness is involved not only in the intentionality of sense experience and imagery but in that of nonimagistic ways of thinking as well Consciousness is pervasively bound up with intelligent perception and conceptual thought it is not mere sensation or raw feel Having thus understood consciousness we can better recognize how for many of us it possesses such deep intrinsic value that life without it would be little or no better than death Las Romanticas Susan Kirkpatrick, 2023-11-15 A pioneering critical work that establishes the existence and elaborates the history of a female literary tradition in Spain early in the nineteenth century this book will greatly interest specialists in Spanish literature It also addresses those concerned with Romanticism in general with feminist criticism and with the cultural history of women Who were las rom nticas The first generation of Spanish women to conceive of themselves as writing women they made their appearance in the press around 1841 It was the apogee of Spain s Romantic movement and of a first wave of liberal reforms and these women gave voice to their experience as women within the terms of liberal Romantic ideology Susan Kirkpatrick examines the textual representations that link liberal ideology Romantic configurations of subjectivity and women s writing in an exciting revelation of early nineteenth century gender consciousness This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1989 Philosophy as a Way of Life Michael Chase, Stephen R. L. Clark, Michael

McGhee,2013-08-05 *Philosophy as a Way of Life* This unique collection of essays on the late Pierre Hadot's revolutionary methodological approach to studying and practicing philosophy explores Hadot's primary conviction that philosophy itself goes beyond solving puzzles and analyzing abstract arguments Hadot believed that philosophy is a key part of humanity's search for happiness that it can transform our perception of the world and thus can alter our very mode of being His argument that the goal of philosophy is to shift our focus away from our habitual obsession with individuality and to embrace universality and objectivity has resonated with thinkers across the Academy and outside it Offering genuinely interdisciplinary analysis of Hadot's work and philosophical practice this volume includes papers written from a gamut of philosophical historical and geographical perspectives Articles address issues in the history of philosophy from Pythagoras to Descartes by way of Islamic thought thus corresponding to Hadot's view of the importance of philologically based analysis of ancient texts and historical contexts Others study the presence of ideas related to or influenced by Hadot in contemporary thought from Wittgenstein to Leonard Nelson analytic philosophy and French postmodernism The result is a wide ranging publication pointing to an additional third way alongside the traditional approaches of Continental and analytic philosophy one that expands our horizons with secular spiritual exercises designed to enable us to be in a fuller more authentic way

*The Politics of Agency* Jeremy Wisniewski,2008 Debates about individualism and holism reductionism and phenomenology and naturalism and humanism all turn on how we answer the basic questions about the nature of human agency This book argues that the traditional emphasis on the accuracy of a given theory of human agency has systematically obscured the normative dimension in these theories and that recognizing this normative dimension allows us to see that a pragmatic approach to theories of agency either in social science or moral philosophy is more appropriate As well as offering a vigorous presentation of the pragmatic therapeutic account of agency Wisniewski also engages critically with three rival accounts from Nietzsche Foucault and Rorty

*Tragedy, Recognition, and the Death of God* Robert R. Williams,2012-09-27 Robert R Williams offers a bold new account of divergences and convergences in the work of Hegel and Nietzsche He explores four themes the philosophy of tragedy recognition and community critique of Kant and the death of God and explicates both thinkers critiques of traditional theology and metaphysics

*Studies in the Upanishads* Thomas Ebenezer Slater,1897

*Bearing the Dead* Esther Schor,1994-11-14 Esther Schor tells us about the persistence of the dead about why they still matter long after we emerge from grief and accept our loss Mourning as a cultural phenomenon has become opaque to us in the twentieth century Schor argues This book is an effort to recover the culture of mourning that thrived in English society from the Enlightenment through the Romantic Age and to recapture its meaning Mourning appears here as the social diffusion of grief through sympathy as a force that constitutes communities and helps us to conceptualize history In the textual and social practices of the British Enlightenment and its early nineteenth century heirs Schor uncovers the ways in which mourning mediated between received ideas of virtue both classical and Christian and a burgeoning property based

commercial society The circulation of sympathies maps the means by which both valued things and values themselves are distributed within a culture Delving into philosophy politics economics and social history as well as literary texts Schor traces a shift in the British discourse of mourning in the wake of the French Revolution What begins as a way to effect a moral consensus in society turns into a means of conceiving and bringing forth history

**The Labor of the Mind** Anthony J. La Vopa, 2017-08-18 How did educated and cultivated men in early modern France and Britain perceive and value their own and women's cognitive capacities and how did women in their circles challenge those perceptions if only by revaluing the kinds of intelligence attributed to them What was thought to distinguish the manly mind from the feminine mind How did awareness of these questions inform various kinds of published and unpublished texts including the philosophical treatise the dialogue the polite essay and the essay in literary criticism The Labor of the Mind plumbs the social and cultural logic of the Enlightenment's trope of the manly mind offers new readings of the textual representations of it and examines the ways in which the trope was subverted or at least subtly questioned With close readings of the writings of well known and less familiar men and women including Poullain de la Barre The Third Earl of Shaftesbury Madeleine de Scudéry David Hume Antoine L. onard Thomas Suzanne Curchod Necker Denis Diderot and Louise d'Epina y and tracing their social networks and friendships Anthony J La Vopa explores the problematic opposition between mental labor as concentrated and sustained work a labor of abstraction and judgment for which only men had the strength and an aesthetic of effortless and tasteful play in polite conversation in which women were thought to excel Covering nearly a century and a half of cultural and intellectual life from France to England and Scotland and then back again La Vopa locates beneath the tenacity of assumed natural differences a lexicon imbued with ambivalence ambiguity and argument The Labor of the Mind reveals the legacy for modernity of a fraught gendering of intellectual labor

*Instinct and Intimacy* Margaret O'Grady, 1999-01-01 As a philosopher of intimacy he stresses the importance of intimate relations and private sentiments in building community bonds
