## 2nd Semester Review Physics:

**Directory of Distance Learning Opportunities** Modoc Press, Inc., 2003-02-28 This book provides an overview of current K-12 courses and programs offered in the United States as correspondence study or via such electronic delivery systems as satellite cable or the Internet. The Directory includes over 6,000 courses offered by 154 institutions or distance learning consortium members. Following an introduction that describes existing practices and delivery methods, the Directory offers three indexes: Subject Index of Courses Offered by Level, Course Level Index, and Geographic Index. All information was supplied by the institutions. Entries include current contact information, a description of the institution and the courses offered, grade level and admission information, tuition and fee information, enrollment periods, delivery information, equipment requirements, credit and grading information, library services and accreditation.

Career Pathways Elaine Makas Howard, Elaine Makas, Pamela J. Ill, 2004 Howard and Ill have given educators a stunning encyclopedic handbook on career pathways. Loaded with helpful lists and charts and written in a clear conversational tone, Career Pathways is the new indispensable resource for superintendents, principals, counselors and teachers. Elaine Johnson Honorary Fellow, Huron College. Career Pathways is the most comprehensive curriculum approach to achieving the dual goal of academic and career maturity. High school educators who seek to promote not just college admissions but college success should consider the career pathways approach. Kenneth Gray Professor, Penn State University. Just imagine all students in your high school taking ownership of their own learning. This is exactly what happens in a student-centered Pathways High School. Instructionally based, the Collaborative Career Pathways approach is to help all students add relevancy to their school work by preparing for the future. Collaborative Pathway High Schools allow students to self-manage and problem solve to better prepare for their future. This excellent resource brings together three crucial pillars: the classroom, the community and the counseling processes that are found in all high schools. Students begin this process by learning about their aptitudes, skills and interests and then selecting one of several broad career paths such as Human Services or Science and Industry. Students experience ongoing goal setting and decision making. Through the classroom, community and counseling processes, your students will be able to design and implement a plan that is just right for them. This is what student-centered learning is all about. Classroom processes remain the key to student-centered and self-directed learning. Integration occurs naturally as students have the opportunity to participate in integrated learning units that include the four core subject areas: technology and one or two electives that all align to state and national standards and benchmarks. Community opportunities begin with guest speakers, chat partners and field trip visits and then progress to job shadowing, internships, mentorships and senior capstone projects. Counseling becomes a key component for students in the areas of academic, career and social and personal skill.

development Ample opportunities abound for role modeling and practice in teaming problem solving conflict resolution character development self management goal setting and decision making By employing the Career Pathways model your school can add relevancy to what students learn and do during their high school years Help students be more focused and team oriented and the true drivers of their own learning
