was first published in 2002 Utilizing the case of the 1994 US decision to delink China s human rights record from most favoured nation status Susan C Morris addresses the critical issues where commercialism and human rights converge This insightful addition to the literature on US foreign policy on human rights draws on both political and economic theory touching upon the relationships between labour conditions and production business and freedom of association management and bargaining and ultimately the relationship between economics and human justice Empirically the work draws on US Congressional proceedings and debates throughout the decade of the 1990s Although the trade and human rights debate has long been ingrained in the rhetoric of scholars the research approaches the issue within the context of communism s last major threshold making it a valuable contribution to the field of international relations

**U.S. Policy Toward China**

Robert G. Sutter,1998-09-03 Increased fluidity and pluralism in U S policy toward China in the post Cold War period have led to growing non governmental influence as both the administration and Congress have become the target of intense lobbying by organized groups concerned with human rights trade opportunities relations with Taiwan and other hotly debated issues This balanced study examines the central role of these organizations focusing especially on two key cases of policy reversal President Clinton s 1994 decision to delink human rights concerns from trade access and his 1995 decision to allow Taiwan s president to visit the United States albeit in a private capacity The recent movement toward a more consistent and coherent administration policy on China remains tentative and has been under mounting attack especially in the wake of Asian campaign contributions Although recognizing that U S policymakers must consider a wider range of interests than was the case during the Cold War Sutter argues that following the prevailing consensus among organized interests may lead to bad

policy Instead he contends that U S foreign policy must strike a balance between satisfying domestic concerns while buttressing interests abroad Internationalising China's Financial Markets Svenja Schlichting,2008-10 Financial reform is often seen as the achilles heel of the overall Chinese reform process this book assesses the stability of the Chinese economy and the nature of its economic governance Svenja Schlichting examines how internationalization has impacted on financial market development in China and how far this has contributed to the development of new institutions within China
