## **The Cambridge Companion To Foucault Cambridge Companions To Philosophy:**

The Cambridge Companion to Foucault Gary Gutting, 1994-02-25 Each volume of this series of companions to major philosophers contains specially commissioned essays by an international team of scholars together with a substantial bibliography and will serve as a reference work for students and non specialists One aim of the series is to dispel the intimidation such readers often feel when faced with the work of a difficult and challenging thinker Michel Foucault one of the most important of contemporary French thinkers exerted a profound influence on philosophy history and social theory Foucault attempted to reveal the historical contingency of ideas that present themselves as necessary truths He carried out this project in a series of original and strikingly controversial studies on the origins of modern medical and social scientific disciplines These studies have raised fundamental philosophical questions about the nature of knowledge and its relation to power structures that have become major topics of discussion throughout the humanities and social sciences

### **Naming**

**Violence** Mathias Thaler, 2018-09-11 Much is at stake when we choose a word for a form of violence whether a conflict is labeled civil war or genocide whether we refer to enhanced interrogation techniques or to torture whether a person is called a terrorist or a patriot Do these decisions reflect the rigorous application of commonly accepted criteria or are they determined by power structures and partisanship How is the language we use for violence entangled with the fight against it In Naming Violence Mathias Thaler articulates a novel perspective on the study of violence that demonstrates why the imagination matters for political theory His analysis of the politics of naming charts a middle ground between moralism and realism arguing that political theory ought to question whether our existing vocabulary enables us to properly identify understand and respond to violence He explores how narrative art thought experiments and historical events can challenge and enlarge our existing ways of thinking about violence Through storytelling hypothetical situations and genealogies the imagination can help us see when definitions of violence need to be revisited by shedding new light on prevalent norms and uncovering the contingent history of ostensibly self evident beliefs Naming Violence demonstrates the importance of political theory to debates about violence across a number of different disciplines from film studies to history

### **The Securitisation of**

Climate Change and the Governmentalisation of Security Franziskus von Lucke, 2020-10-01 This book provides an in depth analysis of the securitisation of climate change in the US Germany and Mexico and offers a rethinking of securitisation theory Resting on a Foucauldian governmentality approach it discusses how different climate security discourses have transformed the political handling of climate change and affected policies practices and institutions Going beyond the literature s predominant focus on the global level it gives a fine grained examination of the political and institutional changes in different national contexts Drawing on the governmentalisation of security the book develops a new understanding of securitisation that focuses on the role of power In doing so it provides new insights into the transformative potential of linking climate change to security but also highlights the political and normative pitfalls of securitisation In this important book Franziskus

von Lucke provides a theoretically sophisticated and empirically rich account of the relationship between security and climate change. Developing a Foucauldian inspired account of securitization the book rejects blanket or universal claims about the climate change security relationship instead insisting on the need to critically examine how the securitization of climate change plays out in particular empirical contexts. Exploring the cases of the US, Germany and Mexico von Lucke points to distinctive dynamics of securitization in these settings with different implications for the practices these in turn encourage. Ultimately this book constitutes an important addition to literature on the relationship between climate change and security while developing a distinct and nuanced account of securitization that will be of interest to a wide range of scholars of security in international relations. Associate Professor Matt McDonald is a Reader in International Relations at the University of Queensland Australia. In 2019 a number of states and other actors notably the European Union have made climate emergency declarations. It is therefore more important than ever to understand what the securitization of the climate means. That is Who can securitize? What security measures are likely deemed legitimate by relevant audiences? How does securitization affect the population within and outside a securitizing state? And perhaps most importantly of all will it succeed? Franziskus von Lucke's carefully researched book offers answers to all of these questions and many others besides. von Lucke proceeds by examining with the US, Mexico and Germany three real life empirical cases of climate securitization. Each one provides unique insights that enable a fuller understanding of climate security. Accessibly written this is a must read for scholars and practitioners alike. Dr Rita Floyd University of Birmingham UK author of *The Morality of Security A theory of just Securitization* CUP 2019. With great empirical detail and conceptual clarity the book compares discourses and practices of climate security in different contexts. An essential reading for anyone interested in international climate politics, securitization theory, governmentality and the notion of power in International Relations. Michener, 2016-04-29. Engaging Deconstructive Theology presents an evangelical approach for theological conversation with postmodern thinkers. Themes are considered from Derrida, Foucault, Mark C. Taylor, Rorty and Cupitt developing dialogue from an open minded evangelical perspective. Ron Michener draws upon insights from radical postmodern thought and seeks to advance an apologetic approach to the Christian faith that acknowledges a mosaic of human sources including experience, literature and the imagination. **The Philosophical Militant** Andrey Gordienko, 2025-11-27. This book explores the link between political revolt and philosophical pursuit of true life in Badiou's work. Books in Print, 1994 *History and the Study of Religion* Stanley Stowers, 2024. How does one understand religion? Can one explain religion? How does one understand the craft and discipline of the historian? How can one best bring together the study of religion with the craft and discipline of the historian? I am a historian who works in the study of religion and

believe that the present intellectual moment offers enormous in some ways unprecedented opportunities both in the study of religion and historiography But at the same time difficulties and dangers loom together with the opportunities My specialty and prime set of examples lie in the study of ancient Mediterranean religion if indeed there is something that can rightly be called Mediterranean religion or even called religion Many specialists in the study of religion and also many of those who study ancient cultures doubt or even reject outright religion as a cross historical category on the one hand and on the other anything common about religion across the ancient Mediterranean And some cognitive scientists who against religion specialists have argued for the centrality of gods to religion then agree with the skeptics that religion is not a coherent social object a social kind I will argue that long discredited forms of anti realism and untenable anthropocentrism haunt both groups Among other areas I work in Christianity and Judaism Do they belong to Mediterranean religion One can easily see how coming to an understanding of what religion is and what Mediterranean religion is form key questions I will argue that religion is a robust realistic entity a social kind and that ancient Mediterranean religion even with all of its great diversity operated with some key common principles It is no secret that Christianity and Judaism have presented themselves as unique and essentially untouched by an inferior and degenerate religiosity that characterized everyone else in the Mediterranean History looks different when one dispenses with such normatively heavy freight and situates the two within rather than outside of Mediterranean religion

**Free Associations** ,1997    **Preaching After God** Phil Snider,2012-08-01 Even though the postmodern return of religion is dramatically shaping the future of twenty first century theology its riches for preaching are rarely mined Preaching After God highlights the trajectories of the postmodern return of religion by introducing readers to the positive theological themes stirring in the work of influential philosophers like Jacques Derrida John Caputo and Slavoj i ek Phil Snider shows how engaging their thought provides possibilities for preaching that highly resonate with postmodern listeners Preachers familiar with the postmodern return of religion will appreciate its homiletical appropriation while those introduced to it for the first time will discover just how much it is helpful for the preaching task Six lectionary based sermons are included as examples    **The Journal of Philosophy** ,1994 Covers topics in philosophy psychology and scientific methods Vols 31 include A Bibliography of philosophy 1933    **The British National**

**Bibliography** Arthur James Wells,2009    *Perspectives on Philosophy of Communication* Pat Arneson,2007 Perspective on Philosophy of Communication provides readers with an appreciation of philosophy of communication as central to understanding and guiding communicative action in a postmodern culture Each chapter provides readers with an understanding of the perspective of a well recognized philosopher s and addresses how his her work creatively informs current problems and issues in human communication This work provides an opportunity for readers to engage the interpretive creative and ultimately pragmatic spirit of selected philosophers who open the possibilities of communicative content in different ways    **Mind** ,1995 Issues for 1896 1900 contain papers of the Aristotelian Society    *The Book*
