**Regional Development** William J. Coffey, James John McRae, 1989 This document presents a broad empirical picture of the national regional and urban structure of the Canadian economy It identifies the factors which may be causing the relative shift towards employment in service industries and occupations and shows that the lack of actual data on interregional flows of service outputs effectively precludes the empirical testing of regional general equilibrium models involving service industries It concludes by bringing forth the regional policy implications embedded in the conceptual and empirical work on service industries      *The Soviet Economy in Regional Perspective* V. Department of Geography,1988 **The Economic Role of International Trade in Canada's Future** Caroline Mutuku,2018-07-18 Document from the year 2018 in the subject Economics Foreign Trade Theory Trade Policy grade 1 language English abstract In the past decade the Canadian economy experienced stagnation owing to the existence of unfavorable economic trends in the regional and global economy It is argued that Canadian economy slipped into a recession because of the challenges faced in building its competitiveness in the international trade network For instance Canada has been relying on regional trade especially with the United States which accounts for the highest portion of international exports and this aspect is linked to the crippling of the Canadian economy Therefore internationalization of trade activities appears to be one of the most reliable approaches for aligning the country s economy with the 21st century global economy This approach will enable the country to increase its export levels which will in turn increase the Gross Domestic Product of Canada This is probably why Laurin 2013 remarks There is a growing perception that Canadian businesses need to turn their attention to overseas markets and shift their business strategies to adapt a new global environment As such the current approach by Canadian premiers to establish trade agreements with international trade partners seem to be an amicable answer to economic tantrums in the Canadian economy The new approach bears significant economic roles in the Canadian economic prospects in the future According to the Council of the Federation it is apparent that strengthening Canada s trade and investment linkages with the global economy will mean addressing challenges and taking advantage of new opportunities This aspect is reaffirmed by Passaris 2013 who observes International trade is both the heartbeat and the lifeblood of the Canadian economy In fact international trade has empowered Canada to side step economic theory Therefore this paper will give an overview on the economic role of international trade in Canada s future **Appalachia in an International Context** Phillip Obermiller,William Philliber,1994-10-30 The study of diverse yet

comparable regions uncovers structural similarities that override the defective culture theory of developing regions as well as the belief that they are unique ecological phenomena This collected work establishes Appalachia as a case study for a coherent cross national perspective Written by authorities on the social and economic problems of these regions this work should assist in alleviating some of the most striking misconceptions about regional development     *Regional Problems and Policies in Canada* John Bachtler,1994 Reviews the activities of the four agencies concerned and shows the links established between sectoral policies and regional actions Examines the types of measures taken and the characteristics of the assistance programmes undertaken and evaluates the results     *The Geography of the Canadian North* Robert M.
