**Putting Systems and Complexity Sciences Into Practice** Joachim P. Sturmberg, 2018-04-10 This idea packed resource takes systems and complexity sciences out of blue sky territory and into the concrete world of contemporary healthcare practice. Beginning with a new reframing of health and illness its chapters redesign traditional disease centered models of care into modern health centered and patient centered health service systems. The approaches shown here combine innovation and common sense to recognize and attend to patients needs across areas including health education and training information accessibility health service organization and delivery and disease in individual context. The variety of solutions applied to this wide spectrum of issues shows the suitability of systems complexity and adaptive thinking to the ongoing objectives of making health services more responsive effective and equitable. Highlights of the coverage Healthy smoker an oxymoron Maybe but it is more complicated than that. Transforming monitoring and improving care with variability derived clinical decision support. Linking Gulf War illness to genome instability somatic evolution and complex adaptive systems. Complexity of knowledge in primary care understanding the discipline's requisite knowledge a bibliometric study.
