The British In Germany Educational Reconstruction After 1945:

The British in Germany Arthur Hearnden, 1978 *Remapping Modern Germany after National Socialism, 1945-1961* Matthew D. Mingus, 2017-10-05 Located in the often contentious center of the European continent German territory has regularly served as a primary tool through which to understand and study Germany's economic cultural and political development Many German geographers throughout the nineteenth and early twentieth centuries became deeply invested in geopolitical determinism the idea that a nation's territorial holdings or losses dictate every other aspect of its existence Taking this as his premise Mingus focuses on the use of maps as mediums through which the United States Great Britain and the Soviet Union sought to reshape German national identity after the Second World War As important as maps and the study of geography have been to the field of European history few scholars have looked at the postwar development of occupied Germany through the lens of the map the most effective means to orient German citizens ontologically within a clearly and purposefully delineated spatial framework Mingus traces the institutions and individuals involved in the massive cartographic overhaul of postwar Germany In doing so he explores not only the causes and methods behind the production and reproduction of Germany's mapped space but also the very real consequences of this practice *The Political Re-Education of Germany and her Allies* Nicholas Pronay, Keith Wilson, 2019-06-26 Originally published in 1985 this book provides an important insight into the principal aspects of the history of the policy and practice of political re education from its origins to 1951 Political re education was the British alternative to the ideas put forward by the USA and the USSR in the common search for a post war policy which would permanently prevent the resurgence of Germany for a third time as a hostile military power It was adopted as Allied policy and remains one of the boldest and most imaginative policies in history for securing lasting peace This book discusses the question of the place of this policy in the preservation of peace and the integration of Germany and Japan into the community of their historical enemies **A British Education Control Officer in Occupied Germany, 1945-1949** David Phillips, 2023-11-30 Edward Aitken Davies 1899 1981 served as an Education Control Officer in the British Zone of occupied Germany from the early summer of 1945 until December 1949 He thus experienced the implementation of policy in the Zone from the very beginnings of the occupation until the founding of the Federal Republic of Germany in 1949 During the period 1945 to 1947 he wrote weekly letters home to his mother Those letters together with the many speeches he gave in Germany during his time as a leading British officer in the Hanover region have not hitherto been available to researchers but can now be made accessible in edited form The letters are placed in the context of developments in British policy and with explanatory notes on the detail Taken together his letters and other documents provide insights into the day to day lives of the impressive group of individuals who oversaw the development of education in Germany from post war chaos to the reform and stability which restored the education system of the country to a pre eminent status in Europe Investigating Education in Germany David Phillips, 2015-06-26 This book brings together

the work of established researcher Professor David Phillips in one authoritative volume Including key chapters on education in Germany from the last three decades topics range from historical studies of universities and schools to detailed research on the role of the British in reconstructing education in Germany after 1945 and education in post unification Germany Together the body of work draws from a multitude of primary sources and constitutes a comprehensive analysis of educational provision in Germany over a long historical period In addition to 16 chapters spanning Phillips research from 1981 to 2012 the book includes a new introduction bringing his ideas together and demonstrating their continuing relevance to the field Investigating Education in Germany will be invaluable reading for academics researchers and postgraduate students in the fields of international and comparative education German studies history of education and sociology

Ideas, Institutions, and the Politics of Schools in Postwar Britain and Germany Gregory Baldi, 2022-05-16 This book addresses one the most contentious issues of postwar Western Europe namely the organization of the primary and secondary stages of schooling in state education systems In examining the politics of continuity and change in postwar schooling in Britain and the Federal Republic Germany Gregory Baldi seeks to contribute to more general understandings of education s place in the welfare state the development of social institutions and the relationship between material and ideational factors in shaping political outcomes over time

Democratizing Education and Educating Democratic Citizens Leslie J. Limage, 2013-10-08 The essays in the book are organized into three sections in order to address the conceptualization of democracy and citizenship reform efforts towards democratization in various societies and educational efforts to foster democratic citizens Each is written from a different historical and national perspective by an international panel of prominent comparative education scholars and each tackles the theme of democracy and civic duty in education

Reconstruction in Post-war Germany Ian D. Turner, 1989 The reconstruction of post war Germany is a major research focus for historians This book offers insights into Allied occupation policy in the late 1940s showing the painful adjustment which German industry institutions and citizens had to make in the post 1945 world

Teaching a Dark Chapter Daniela R. P. Weiner, 2024-07-15 Teaching a Dark Chapter explores how textbook narratives about the Fascist Nazi past in Italy East Germany and West Germany followed relatively calm undisturbed paths of little change until isolated flashpoints catalyzed the educational infrastructure into periods of rapid transformation Though these flashpoints varied among Italy and the Germanys they all roughly conformed to a chronological scheme and permanently changed how each dark past was represented Historians have often neglected textbooks as sources in their engagement with the reconstruction of postfascist states and the development of postwar memory culture But as Teaching a Dark Chapter demonstrates textbooks yield new insights and suggest a new chronology of the changes in postwar memory culture that other sources overlook Employing a methodological and temporal rethinking of the narratives surrounding the development of European Holocaust memory Daniela R P Weiner reveals how long before 1968 textbooks in these three countries served as important tools to influence public memory about Nazi Fascist

atrocities As Fascism had been spread through education then education must play a key role in undoing the damage Thus to repair and shape postwar societies textbooks became an avenue to inculcate youths with desirable democratic and socialist values Teaching a Dark Chapter weds the historical study of public memory with the educational study of textbooks to ask how and why the textbooks were created what they said and how they affected the society around them **Education and Work in the Federal Republic of Germany** M. E. Taylor, 1981 Monograph on vocational education trends in Germany Federal Republic discusses the historical development impact of technological change vocational training educational reform educational policies employment policies etc comments on legislation and includes a glossary Bibliography pp 331 to 349 and references *Britain and Germany in the Twentieth Century* Manfred Görtemaker, 2006 Britain and Germany have had a complex relationship throughout the 20th century from enemies at war to allies in peace This title examines Hess appeasement naval competition Lloyd George and the Weimar Republic British German NATO cooperation the US connection and the discord of Kohl and Thatcher **The German Question and the International Order, 1943-48** Nicolas Lewkowicz, 2010-09-30 Examines the origins of the Cold War focusing on topics such as the normative framework established during WWII which served to contain the emergence of a new systemic conflict and the transformation of the international political system driven by superpower discussion of the German Question **Modern Europe After Fascism, 1943-1980s**, 1998 **German Politics and Society from 1933 to the Wende** Janet Wharton, 1992 Education and Society in Germany H. J. Hahn, 1998-03 The German education system has long been admired and at times envied by the rest of Europe but the history of German educational development is a turbulent one Concentrating on the post war German scene this timely book examines the interrelationship of educational and social developments in Germany from 1810 to the present day Providing new insights into German history and challenging traditionally held opinions about Germany education and society the author questions for example whether Germany's rapid industrial growth and economic success in the late nineteenth century were based upon its academic development or the country's much less acclaimed training in crafts and vocational subjects The rise of a new academic elite and its possible contribution both to the collapse of Germany's first democratic government and to the emergence of National Socialism are examined as are the stagnation of the educational system in West Germany which led to the student unrest of 1968 and the modern system introduced in East Germany under Soviet influence which failed to be implemented in an open and democratic fashion In considering the opportunities offered by reunification and the effects of emerging reform movements the author argues that Germany now seems to have reached a new impasse with overcrowded under resourced universities a socially divisive school system and uncertainty as to how to meet the challenges of the next century The interdisciplinary nature of this volume will make it essential reading for all those interested in German history and politics comparative education and sociology and a core text for students **Oxford Studies in Comparative Education** David Phillips, 1992 The papers which make up this volume were for the most part

presented at a program of seminars given in Oxford England in the autumn of 1990 The seminars represented the first activity of the new Centre for Comparative Studies in Education installed at the Department of Educational Studies of the University of Oxford in January 1990 The Centre's principal objective is to collect and analyze data on education in other countries in order to make comparisons with the United Kingdom that might inform policy discussions The present collection seeks to make a contribution to two important questions in the study of comparative education What lessons can be learned from cross national studies of issues in education and What problems of comparative method do such studies have to address The nine papers in the collection include Introduction David Phillips An International Comparison of Access to Higher Education A H Halsey Schools of Education and Teacher Education Harry Judge Education Training and Economic Performance in Comparative Perspective David Finegold French Lessons Comparative Perspectives on What It Means to be a Teacher Patricia Broadfoot Marilyn Osborn Apprentice Training in Germany The Experiences of the 1980s Bernard Casey Alternative Funding of Education Systems Some Lessons from Third World Experiments Keith Watson Unlearned European Lessons Why Austria Abandoned the Comprehensive School Experiments and Restored the Gymnasium Karl Heinz Gruber and Japan Pupil Turned Teacher Roger Goodman DB *Adult Education in Continental Europe* Jindra Kulich, International Council for Adult Education, 1982 This annotated bibliography lists 836 English language materials dealing with adult education in continental Europe that were written between 1975 and 1979 Organized by country the bibliography deals with the broadest possible concept of adult education Thus it includes works devoted to vocational education for adults adult secondary and postsecondary level credit courses as well as activities of museums art galleries and libraries inasmuch as these involve specifically planned educational programs for individual adults or adult groups Within the above categories the bibliography is subdivided into categories of various institutions methods and techniques and subject matter The following are representative of the categories included in the bibliography the history of adult education comparative studies biographies educational legislation financing adult education statewide regional and local level adult education institutions and organizations study circles and discussion groups correspondence study independent study and distance education adult basic education retraining the education of women workers education pre retirement education and programs for retired persons lifelong learning religious education hobbies arts and crafts community development research in adult education and the theory of adult education MN *German Universities After the Surrender* David Phillips, 1983 Re-educating German Women Denise Tscharntke, 2003 This book examines the influence British women exercised on German women after the Second World War as officers in the Women's Affairs Section of the British Military Government and as Visiting Experts in women's affairs invited by the British Foreign Office The British saw that women were the majority of the German workforce and electorate whose active citizenship and labour was necessary for reestablishing the German economy and introducing democracy A special Women's Affairs Section was established with the task to educate German women accordingly The re

education of German women centred more on the fulfillment of civic duties than on the extension of women's civic or social rights
