The Calculated Risk

The Calculated Risk:

Calculating Risks? James Hamilton, W. Kip Viscusi, 1999 By matching agency decision data to detailed census information using geographic information systems GIS technology the authors show that most hazardous waste sites do not pose sufficient risk to merit the most stringent cleanup options Those sites that do pose considerable risk to exposed populations often receive inadequate attention because government decisions to target cleanups are based more on political factors than on actual risks The authors propose policy reforms that could significantly reduce cleanup costs without sacrificing the protection of human health **BOOK JACKET** The Calculated Risk Everette Howard Hunt, 1948* Safety Digest United States. Army Materiel Command, 1962-11 **Entrepreneurial Drive and Performance in an Industry Ecosystem** Simon Kamuri, 2022-11-29 This book will further knowledge and invite the exchange of ideas in academia policy and practice of entrepreneurship from an ecosystem perspective It spotlights an increasingly important perspective of understanding and developing individual entrepreneurship that can impact businesses industries economies and societies It uniquely examines the link between individual entrepreneurship and the competitive performance of actors in an industry using Kenya's leather industry as an illustrative case The book provides conceptual models of entrepreneurial drive as a valid construct that should guide understanding and interventions for developing entrepreneurship in academia practice and policy Thus it acknowledges the role of individuals their entrepreneurial abilities the diverse roles they play in an industry and the resultant potential in innovation and broad based performance outcomes Coming at a time where entrepreneurship and innovation attention are centred on knowledge based industries this book uses the case of a primary or factor driven industry to refocus attention on an area of economic advantage that is typical of African countries **Environmental Health Perspectives**, 1993 **Politics, Economics, and Welfare** Robert A.
