Margery Allingham

The Carbon Murder:

The Carbon Murder Camille Minichino, 2004-03-01 Gloria Lamerino's goddaughter Mary Catherine Galigani MC to her friends needs a change in her life. She decides to move back to her hometown of Revere, Massachusetts, thereby ridding herself of both an abusive relationship and an unfulfilling job in Houston, Texas. At least that's the plan. When two homicides disrupt MC's peaceful return to Revere, Gloria applies her not inconsiderable detecting skills to help the police solve the crimes. At the same time, Gloria must face the medical problems of her partner Detective Matt Gennaro and the next steps in their relationship. In this sixth periodic table mystery, Gloria delves behind the scenes into the worlds of nanotechnology and show horses and unwittingly uncovers a crime ring larger than the distance between Texas and Massachusetts. **The Carbon Murders Mystery** Frank W. Anderson, 1973 *The Carbon Murder Mysteries (softcover)*. , **The Carbon Murder** Camille Minichino, 2004 Gloria Lamerino's goddaughter Mary Catherine Galigani MC to her friends needs a change in her life. She decides to move back to her hometown of Revere, Massachusetts, thereby ridding herself of an abusive relationship and an unfulfilling job in Houston, Texas. At least that's the plan. When two homicides disrupt MC's peaceful return to Revere, Gloria applies her detecting skills to helping the police solve the crime. [The Square Root of Murder](#) Camille Minichino, 2019-08-25 Math Professor Sophie Knowles shares her teaching venue with many other math and science faculty, most of whom she gets along with. But one in particular gives Sophie and her teaching assistant Rachel a hard time, thus annoying both women. When this colleague, a professor of chemistry, is found dead, poisoned in his office, Rachel is the prime suspect. It's up to Sophie to put her talent for designing and solving puzzles to use to find his killer. *Handbook of Transnational Environmental Crime* Lorraine Elliott, William H. Schaedla, 2016-07-27 Crimes associated with the illegal trade in wildlife, timber, and fish stocks, pollutants, and waste have become increasingly transnational, organized, and serious. They warrant attention because of their environmental consequences, their human toll, their impacts on the rule of law, and good governance, and their links with violence, corruption, and a range of crossover crimes. This ground-breaking, multi-disciplinary Handbook brings together leading scholars and practitioners to examine key sectors in transnational environmental crime and to explore its most significant conceptual, operational, and enforcement challenges. **Environmental Crime and its Victims** Toine Spapens, Rob White, Marieke Kluin, 2016-05-06 Environmental crime is one of the most profitable and fastest growing areas of international criminal activity. These types of crime, however, do not always produce an immediate consequence, and the harm may be diffused. As such, the complexity of victimization in terms of time, space, impact, and who or what is victimized is one of the reasons why governments and the enforcement community have trouble in finding suitable and effective responses. This book provides a diverse and provocative array of arguments, critiques, and recommendations from leading researchers and scholars in the field of green criminology. The chapters are divided into three main sections: the first part deals with specific characteristics of some of the major types of environmental crime and its perpetrators; the

second focuses explicitly on the problem of victimization in cases of environmental crime and the third addresses the question of how to tackle this problem. Discussing these topics from the point of view of green criminological theory, sociology, law enforcement, community wellbeing, environmental activism, and victimology, this book will be of great interest to all those concerned about crime and the environment.
