**Social Theory and Postcommunism** William Outhwaite,Larry Ray,2008-04-15 Social Theory and Postcommunism undertakes a thorough study of the implications of post communism for sociological theory Written by two leading social theorists the book discusses the thesis that the fall of communism has decimated alternative conceptions of social organizations other than capitalism Analyzes the implications of the fall of communism on social theory Discusses alternative ideas of social organizations other than capitalism in the wake of the collapse of communism Covers state civil society globalization the future of modernity and post socialism      *Soviet Politics* Richard Sakwa,2012-11-12 Soviet Politics in Perspective is a new edition of Richard Sakwa's successful textbook Soviet Politics an introduction Thoroughly revised and updated it builds on the previous editions comprehensive and accessible exploration of the Soviet system from its rise in 1919 to its collapse in 1991 The book is divided into five parts which focus on key aspects of Soviet politics They are historical perspectives beginning with the Tsarist regime on the eve of Revolution the rise and development of Stalinism through to the decline of the regime under Brezhnev and his successors and Gorbachev's attempts to revive the system institutions of Government such as the Communist Party security apparatus the military the justice system local government and participation theoretical approaches to Soviet politics including class and gender politics the role of ideology and the shift from dissent to pluralism key policy areas the command economy and reform nationality politics and foreign and defence policy an evaluation of Soviet rule and reasons for its collapse Providing key texts and bibliographies this book offers the complete history and politics of the Soviet period in a single volume It will be indispensable to students of Soviet and post Soviet politics as well as the interested general reader      **Cultural Landscapes of Post-Socialist Cities** Professor Mariusz Czepczynski,2012-11-28 The cultural landscapes of Central European cities reflect over half a century of socialism and are marked by the Marxists vision of a utopian landscape Architecture urban planning and the visual arts were considered to be powerful means of expressing the people's power However since the velvet revolutions of 1989 this urban scenery has been radically transformed by new forces and trends infused by the free market democracy and liberalization This has led to landscape cleansing and recycling as these former communist nations used new architectural functional and social forms to transform their urban spaces their meanings and uses Comparing case studies from different post socialist cities this book examines the culturally conditional variations between local powers and structures despite the similarities in the general processes and systems It considers the contemporary cultural landscapes of these post socialist cities as a dynamic fusion of the old communist forms and new free market meanings features and democratic practices of global influences and local icons The book assesses whether these urban spaces clearly reflect the social cultural and political conditions and aspirations of these transitional countries and so a critical analysis of them provides important insights      The Routledge History

Handbook of Central and Eastern Europe in the Twentieth Century Włodzimierz Borodziej, Sabina Ferhadbegović, Joachim von Puttkamer, 2020-04-21 Statehood examines the extending lines of development of nation state systems in Eastern Europe in particular considering why certain tendencies in state development found a different expression in this region compared to other parts of the continent This volume discusses the differences between the social developments political decisions and historical experience that have influenced processes of state building with a focus on the structural problems of the region and the different paths taken to overcome them The book addresses processes of building social orders and examines the contribution of state institutions to social and cultural integration and disintegration It analyses institutional and personnel continuities that have outlasted the great political changes of the twentieth century and addresses the expansion of state activity in shaping property relations in agriculture and industry as well as in social security and family politics Taking a comparative approach based on experiential history allowing individual experience to be detached from specific national references the volume delineates a transnational comparison of problems shared within the region as they have been passed down through history providing definition to the specificity of Eastern Europe and situating the historical experience of the region within a pan European context The second in a four volume set on Central and Eastern Europe in the twentieth century it is the go to resource for those interested in statehood and state building in this complex region *The Bureaucratic State* Robert D. Miewald, 1984 **The End of Social Inequality?** David Lane, 2024-11-26 The End of Social Inequality 1982 examines class and social stratification under state socialism and in particular in the Soviet Union Its discussion ranges over such aspects as income and education differentials the rise of white collar occupations the position of women and ethnic groups and social mobility Public Value Theory and Budgeting Usman W. Chohan, 2019-05-22 Public value theory has advanced over the past 30 years but there is a need to extend its boundary outwards into new contexts and update its discourse to reflect new social challenges We are now trying to create value in a globalized world with supranational entities with new international alliances and institutions in a frightening post truth era How can public managers grapple with these emerging realities This book seeks to provide answers to such public value questions by applying powerful budgeting perspectives Using case studies of independent budget offices key fiscal instruments and leading public value frameworks this book stands out in its use of budgetary lenses to answer pertinent questions about the multidimensional processes of value creation by and for a wider society Pushing the debate on public value forward and taking it onto the global stage the book asks whether public value and other public administration theories are applicable beyond the traditional context of the pro globalization Western liberal democracies in which they were conceived It does this by exploring the realms of developing countries supranational entities and post Communist societies among others Finally it presents these explorations in light of very recent sociopolitical trends and phenomena including the growth of civil society the global financial crisis the illiberal democracy and the post truth era Tailored to an audience comprising public

administration scholars students of government budget practitioners and social scientists interested in contemporary problems of values in society this book helps to advance public administration thought by extending public value theory into new contexts and relating it to the growing global challenges of public life      **A Sociology of the Soviet Union** Gary Littlejohn, 1984      *The Dissolution of Communist Power* Ágnes Horváth, Árpád Szakolczai, 1992 The speed and seeming ease with which the communist systems of Eastern Europe collapsed raise interesting questions about the stability of the structure that held them in place Agnes Horvath and Arpad Szakolczai attempt to explain the demise of communist power by analysing in detail the internal apparatus of the communist regime in Hungary shortly before these historic changes took place The book is based on unique empirical material the result of a sociological survey carried out in 1988 in the district level communist party committees of Budapest Extensive interviewing and direct questionnaires to party workers revealed the extent of the interpenetration of communist power and society but also began to reveal the gradual self elimination process of the communist system As events gathered momentum in Hungary the data gained significance as the documentation of a system in dissolution This material is published here in English for the first time and serves as the basis for a study which uses the methods of Foucault to provide insight into the social relationships of the old system and the connected problems of the post communist epoch The authors provide evidence of the subtle influence still retained by communist method in a country which is attempting to forge a new course      **Studies in Organizational Sociology** Gale Miller, 1991 Continuing themes in organizational studies Organizations are real Trends and issues in organizational sociology Perspectives on organizations Studies of contemporary organizations      **The Solitude of Collectivism** David A.
