Neuliep,2006 This introduction to intercultural communication provides students with a clear model for examining communication within cultural micro cultural environmental socio relational and perceptual contexts The author depicts his theory as a series of circles representing the idea that communication is defined by the interdependence of cultural contexts His presentation of contexts begins with the outermost cultural circle of the model and moves inward toward the most specific traits of communication verbal and non verbal messages Each chapter focuses on one context and the combination of factors included within that context setting situation and circumstances The text also highlights influences such as values ethnicity physical geography and attitudes and then examines certain means of interaction including body language eye contact and the exchange of words Additional topics covered include the stages of relationships cross cultural management intercultural conflict and culture shock Features Self report instruments help students understand themselves and assess their performance and skill development as they learn the important concepts of intercultural communication Every chapter contains a summary glossary of terms and an extensive reference list Photos charts and graphs help make the material more accessible and realistic to students A content rich Website offers resources for instructors and students including PowerPoint slides to enhance class presentations **Impact of Gender, Organizational Role, and Multicultural Status on Conflict Resolution Style Preference** Jennifer Lea Holt,2000 This research involved primarily a meta analysis of conflict resolution research derived from Blake and Mouton s

1964 dual concerns theory Secondarily focus group research assessed the field validity of the results Dual concerns theory postulates that organizational conflict involves balancing the desire to obtain one's own goals concern for production versus the desire to retain interpersonal relationships concern for people By placing the two aspects on an axis called the managerial grid Blake and Mouton mapped out five styles of managing conflict forcing avoiding accommodating compromising and problem solving Numerous studies validate the central ideas of the theory respondents rank styles of resolving conflict depending upon the degree of concern for retaining relationships versus the degree of concern for meeting goals However there is great disparity among study results In this study meta analytic techniques were used to provide a clearer overall picture of conflict resolution rankings Analyses were conducted of published and unpublished research results with statistical measures of conflict resolution style preferences focusing on the variables of worker minority status including ethnicity gender and foreign national and organizational role status of referent group including superior subordinate and peer The results of the meta analyses were 1 Ethnicity and foreign national insufficient studies for overall meta analysis tentative results using one instrument showed Asian ethnicities highest on avoiding Middle Easterners highest on compromising Hispanic Americans highest on accommodating African Americans lowest on avoiding and European Americans highest on problem solving 2 Gender meta analysis indicated females were significantly more likely to use accommodating and compromising males significantly preferred forcing 3 Organizational role meta analysis indicated respondents used avoiding significantly more with peers than with subordinates and compromising style less with subordinates than superiors Focus group results corroborated the results in general but there was strong consensus about the need to regard each individual as a unique combination of many influences Further research is needed particularly on multicultural status however due to the tendency for pertinent studies to favor more inclusive conflict resolution instruments than those utilized for the purposes of this research other means of overall analysis should be considered
