Spectacular Nature Corporate Cultu:

Spectacular Nature Susan G. Davis,1997-10-31 An overview of sea world and corporate culture **Sounding the Limits of Life** Stefan Helmreich,2015-10-27 What is life What is water What is sound In Sounding the Limits of Life anthropologist Stefan Helmreich investigates how contemporary scientists biologists oceanographers and audio engineers are redefining these crucial concepts Life water and sound are phenomena at once empirical and abstract material and formal scientific and social In the age of synthetic biology rising sea levels and new technologies of listening these phenomena stretch toward their conceptual snapping points breaching the boundaries between the natural cultural and virtual Through examinations of the computational life sciences marine biology astrobiology acoustics and more Helmreich follows scientists to the limits of these categories Along the way he offers critical accounts of such other than human entities as digital life forms microbes coral reefs whales seawater extraterrestrials tsunamis seashells and bionic cochlea He develops a new notion of sounding as investigating fathoming listening to describe the form of inquiry appropriate for tracking meanings and practices of the biological aquatic and sonic in a time of global change and climate crisis Sounding the Limits of Life shows that life water and sound no longer mean what they once did and that what count as their essential natures are under dynamic revision **The Playful Crowd** Gary Cross,John K. Walton,2005-10-18 During the first part of the twentieth century thousands of working class New Yorkers flocked to Coney Island in search of a release from their workaday lives and the values of bourgeois society On the other side of the Atlantic British workers headed off to the beach resort of Blackpool for entertainment and relaxation However by the middle of the century a new type of park began to emerge providing well ordered squeaky clean and carefully orchestrated corporate entertainment Contrasting the experiences of Coney Island and Blackpool with those of Disneyland and Beamish Gary S Cross and John K Walton explore playful crowds and the pursuit of pleasure in the twentieth century to offer a transatlantic perspective on changing ideas about leisure class and mass culture Blackpool and Coney Island were the definitive playgrounds of the industrial working class Teeming crowds partook of a gritty vulgarity that offered a variety of pleasures and thrills from roller coaster rides and freak shows to dance halls and dioramas of exotic locales Responding to the new money and mobility of the working class the purveyors of Coney Island and Blackpool offered the playful crowd an industrial saturnalia Cross and Walton capture the sights and sounds of Blackpool and Coney Island and consider how these Sodoms by the sea flouted the social and cultural status quo The authors also examine the resorts very different fates as Coney Island has now become a mere shadow of its former self while Blackpool continues to lure visitors and offer new attractions The authors also explore the experiences offered at Disneyland and Beamish a heritage park that celebrates Britain's industrial and social history While both parks borrowed elements from their predecessors they also adapted to the longings and concerns of postwar consumer culture Appealing to middle class families Disney provided crowds a chance to indulge in child like innocence and a nostalgia for a simpler time At Beamish crowds

gathered to find an escape from the fragmented and hedonistic life of modern society in a reconstructed realm of the past where local traditions and nature prevail *Entertaining Elephants* Susan Nance,2013-03-27 How the lives and labors of nineteenth century circus elephants shaped the entertainment industry Consider the career of an enduring if controversial icon of American entertainment the genial circus elephant In Entertaining Elephants Susan Nance examines elephant behavior drawing on the scientific literature of animal cognition learning and communications to offer a study of elephants as actors rather than objects in American circus entertainment between 1800 and 1940 By developing a deeper understanding of animal behavior Nance asserts we can more fully explain the common history of all species Entertaining Elephants is the first account that uses research on animal welfare health and cognition to interpret the historical record examining how both circus people and elephants struggled behind the scenes to meet the profit necessities of the entertainment business The book does not claim that elephants understood endorsed or resisted the world of show business as a human cultural or business practice but it does speak of elephants rejecting the conditions of their experience They lived in a kind of parallel reality in the circus one that was defined by their interactions with people other elephants horses bull hooks hay and the weather Nance s study informs and complicates contemporary debates over human interactions with animals in entertainment and beyond questioning the idea of human control over animals and people s claims to speak for them As sentient beings these elephants exercised agency but they had no way of understanding the human cultures that created their captivity and they obviously had no claim on human social and political power They often lived lives of apparent desperation

Looking at Animals in Human History Linda Kalof,2007-08-15 From the first cave paintings to Britta Jaschinski s provocative animal photography it seems we have been describing and portraying animals in some form or another for as long as we have been human This book provides a broad historical overview of our representations of animals from prehistory to postmodernity and how those representations have altered with changing social conditions Taking in a wide range of visual and textual materials Linda Kalof unearths many surprising and revealing examples of our depictions of animals She also examines animals in a broad sweep of literature narrative and criticism from Pliny the Elder s Natural History to Donna Haraway s writings on animal human machine interaction and from accounts of the Black Plague and histories of the domestic animal and zoos to the ways that animal stereotypes have been applied to people to highlight hierarchies of gender race and class Well researched and scholarly yet very accessible this book is a significant contribution to the human animal story Featuring more than 60 images Looking at Animals in Human History brings together a wealth of information that will appeal to the wide audience interested in animals as well as to specialists in many disciplines Linda Kalof is professor of sociology at Michigan State University Her books include The Earthscan Reader in Environmental Values and The Animals Reader The Essential Classic and Contemporary Writings

The Routledge Handbook of Environment and Communication Anders Hansen,Robert Cox,2015-03-05 This Handbook provides a comprehensive

statement and reference point for theory research and practice with regard to environment and communication and it does this from a perspective which is both international and multi disciplinary in scope Offering comprehensive critical reviews of the history and state of the art of research into the key dimensions of environmental communication the chapters of this handbook together demonstrate the strengths of multi disciplinary and cross disciplinary approaches to understanding the centrality of communication to how the environment is constructed and indeed contested socially politically and culturally Organised in five thematic sections The Routledge Handbook of Environment and Communication includes contributions from internationally recognised leaders in the field The first section looks at the history and development of the discipline from a range of theoretical perspectives Section two considers the sources communicators and media professionals involved in producing environmental communication Section three examines research on news entertainment media and cultural representations of the environment The fourth section looks at the social and political implications of environmental communication with the final section discussing likely future trajectories for the field The first reference Handbook to offer a state of the art comprehensive overview of the emerging field of environmental communication research this authoritative text is a must for scholars of environmental communication across a range of disciplines including environmental studies media and communication studies cultural studies and related disciplines Red Lodge and the Mythic West Bonnie Christensen,2002 Tracing the story of Red Lodge from the 1880s to the present Christensen tells how a mining town managed to endure the vagaries of the West's unpredictable extractive industries economy She connects Red Lodge to a myriad of larger events and historical forces to show how national and regional influences have contributed to the development of local identities exploring how and why westerners first rejected and then embraced western images and how ethnicity wilderness and historic preservation became part of the identity that defined one town **BOOK JACKET**
