# The I Q Argument

**Dorothy Rogers**

## **The I Q Argument:**

The IQ Argument: Race, Intelligence, and Education Hans Jurgen Eysenck, 1971 The author argues that the observed variability in IQ scores between Black and white people is genetically determined but should not be a factor in supporting segregation

**The IQ Argument** H. Eysenck, 1971      **The IQ Game** Howard Francis Taylor, 1980      **The IQ Debate** Stephen H. Aby, Martha J. McNamara, 1990-11-30

Over the past twenty years one of the most bitter debates within the social sciences has centered on Arthur Jensen's contention that American blacks are on average less intelligent than whites and that this alleged difference is genetic in origin. Aby's selective annotated bibliography offers scholars a concise guide to the storm of argument and counterargument over Jensen's suggestion and to the scientific, legal, educational, philosophic and social issues it has raised. Aby has catalogued and described more than 400 books, book chapters, professional journal articles, newspaper and magazine articles, source documents, media materials and reference sources relating to the controversy. He begins with an overview of the IQ debate, its history and the principal participants. He then arranges bibliographic entries in chapters according to the type of source; each entry includes descriptive annotations of up to 300 words. A glossary explains technical terms that are used in the annotations and in the debate itself. This bibliography will be an important addition to collections in education, sociology and psychology as well as a resource for courses on educational testing and measurement, racism, sociology of education and black education.

*Boston Studies in the Philosophy of Science*, 1976      *Why Men Rule* Steven Goldberg, 1993

The first edition of this book was lavishly praised by many authorities as the most formidable demonstration of an unpopular truth: males rule in all societies known to history or anthropology for reasons arising from innate physiology, a brute fact that can never be conjured away by tinkering with social institutions. This new edition has been completely rewritten in the light of two decades of scholarship and debate, taking account of all published criticisms of earlier editions.

*PSA 1974* Robert S. Cohen, Cliff Hooker, Alex C. Michalos, James Van Evra, 1976-10-31

For this book we have selected papers from symposia and contributed sessions at the fourth biennial meeting of the Philosophy of Science Association held at the University of Notre Dame on November 1-3, 1974. The meeting was lively and well attended and we regret that there was no way to record here the many stimulating discussions after the papers and during the informal hours. We also regret that we had insufficient space for all the contributed papers. Even more, some of the symposia were not available: those on systems and decision theory by W. Churchman, P. Suppes, I. Levi and on the Marxist philosophy of science by M. Wartofsky, R. S. Cohen, E. N. Hiebert. Unhappily, several individual contributions to other symposia were likewise not available: I. Velikovsky in the session on his own work and the politics of science; D. Finkelstein in the session on quantum logic. Memorial minutes were read for Alan Ross Anderson prepared by Nuel Belnap and for Imre Lakatos prepared by Paul Feyerabend. They initiate this volume of philosophy of science in the mid-seventies.
