It introduces place attachment the bonding that occurs between individuals and their meaningful environments as a new explanation for equity home bias and presents a philosophically multi paradigmatic view of place attachment. For the first time a comprehensive and up to date review of the extant literature is provided demonstrating that place attachment is a contributing factor to 22 different topics in which variations of home bias are present. The author also analyses the social psychological underpinnings of place attachment and considers the effect of multi culturalism on the future of equity home bias. The book's unique approach discusses the issues in conceptual terms rather than through data and statistical methods. This multi and inter disciplinary book is an invaluable resource for graduate students and researchers interested in economics finance philosophy and or methodology introducing them to a new line of research
