Hansen, 2015 *Mapping the Germans* explores the development of statistical science and cartography in Germany between the beginning of the nineteenth century and the start of World War One examining their impact on the German national identity It asks how spatially specific knowledge about the nation was constructed showing the contested and difficult nature of objectifying this frustratingly elastic concept Ideology and politics were not themselves capable of providing satisfactory answers to questions about the geography and membership of the nation rather technology also played a key role in this process helping to produce the scientific authority needed to make the resulting maps and statistics realistic In this sense *Mapping the Germans* is about how the abstract idea of the nation was transformed into a something that seemed objectively

measurable and politically manageable Jason Hansen also examines the birth of radical nationalism in central Europe advancing the novel argument that it was changes to the vision of nationality rather than economic anxieties or ideological shifts that radicalized nationalist practice at the close of the nineteenth century Numbers and maps enabled activists to see nationality in local and spatially specific ways enabling them to make strategic decisions about where to best direct their resources In essence they transformed nationality into something that was actionable that ordinary people could take real actions to influence

Wells, Paula Bailey Smith, 1996 This text examines the effects on US Europe relations brought about by the end of the Cold War and the changes

in political relations between European states The current situation is compared and contrasted with the creation of a new Europe in 1919 in the belief that many of the issues are similar and even that many of the post Cold War issues have their origins in World War I and its peace settlement Topics covered include alterations in international systems public opinion and propaganda minority rights economic transitions lessons from the break up of Yugoslavia and collective security **Wilson** John Braeman,1972 The GREAT LIVES OBSERVED series combines the intimacy of autobiography the immediacy of eyewitness observation and the objectivity of modern scholarship In WILSON Jhon Braeman presents Wilson s own words the views of his contemporaries and analyses in retrospect by leading historians and political scientists to create a three fold perspective In domestic affairs Woodrow Wilson s administration brought to a climax the movement for progressive reform which had been gathering strength since the late nineteenth century And his plans for a universal peace organization ushered in a new era in international politics The selection in this volume offers the reader an intimate portrait of the complex and often contradictory personality of a man motivated by deep loyalties and firm moral convictions but whose stubborn refusal to compromise eventually led to the defeat of American entry into his own beloved League of Nations Wilson s own writings the views of his contemporaries including Theodore Roosevelt and Robert Lansing Wilson s Secretary of State and the appraisals of such modern historians as Arthur S Link John M Blum and Richard Hofstadter furnish a dispassionate study of the triumphs and failures of a man whose greatest dreams for America and the world have at last reached full fruition in today s United Nations Publisher *U.S. Diplomacy Since 1900* Robert D.
